

The Smart Time Clock

Discover the power of the world's most flexible, scalable and reliable time & attendance solution

About NoahFace

NoahFace is revolutionizing the modern time clock by transforming standard Apple iPads into powerful time & attendance solutions. Using facial recognition and a suite of customization features, NoahFace can be tailored and scaled to meet the time & attendance needs of organizations large and small.

Key Benefits

- Dramatically reduces hardware costs with no proprietary hardware needed*
- Helps eliminate time fraud using facial recognition
- Offers unmatched speed with lightning-fast clocking that reduces long lines at the time clock
- Promotes safer workplaces with touchless clocking, health & safety attestation, and employee fatigue tracking

Who We Benefit

While NoahFace can benefit virtually any company with hourly staff, we are uniquely suited to support companies with:

- Complex data capture needs around cost centers / project tracking
- Challenges around time-clock fraud
- Needs for touchless clocking
- Aversion to costly upfront hardware costs
- Long lines at clocking stations

Feature Highlights

- Mobile time tracking via NoahFace Go mobile app
- Job tracking / job costing
- Team management, including group punching and management
- Temperature and alcohol screening (*Requires additional hardware)
- Employee sentiment analysis and reporting
- Attestation at clock in to protect business interests around accurate payroll, break periods, health & safety, and more
